20.09.2022

A counselling session for students of Ist and IInd semester regarding how to prepare of competitive exams and focus on NET JRF preparations was organised by Research scholars from 20.9.2022 to 21.9.2022 in Department of Political Science.

celebration on the foundation day
Extension Lecture held on 27/7/2022 from 11.30 AM to 1.30 PM.

Speaker: Prof P. K. Chaudhary Fellow, IAS, Shimla

Title: "An Analysis of Political Behaviour in Contemporary India: Contemplation in Public Choice Framework"

A special Extension Lecture was organized by the Department of Political Science, HPU on 27-7-2022 from 11.30 AM to 1.30 PM (Two lectures)

The following Faculty members were present:

1. Prof. Anand Sharma
2. Prof. Anand Sharma
3. Prof. Anand Sharma
4. Prof. Anand Sharma

CRITERION-2.2.1

Advanced study materials relevant to competitive exams is provided

Special attention is being given to slow learners

2.2.1

Entrance test conducted at the time of admission helps to assess student's knowledge base, skills and their abilities. Further, during the first week/ zero week of the commencement of the teaching programme, few classes are devoted to evaluate the differential requirements of the students and to know their area of interest. Based on this analysis, students who need extra support are identified for remedial coaching.

After the first internal assessment test/ class quiz the students who secure less marks or show relatively poor performance in their class quiz are considered as slow learners and the rest are treated as advanced learners. In order to grasp new concepts, a slow learner needs more time, more repetition and more resources from teachers which are provided from time to time to develop their interest in the subject. Quick learner students are motivated to appear for competitive examinations. Learning needs of the students are assessed by getting constant feedback from the learners during the semester. The students are encouraged to participate in seminars and symposia conducted by other institutions and motivating them to publish technical papers in reputed journals. Special coaching for competitive examination (UGC NET/ JRF/ SET) is imparted to advanced learners in collaboration with pre examination coaching centre, Himachal Pradesh University.

Department of Physical Education

Student Diversity into Slow Learner or Advance Learner

Session (2022-2023)

Once the classes of theory and practical commence, the teachers assess the students through subjective as well as objective assessment (class tests and competition performance). Group and one-to-one interaction between students and teacher during teaching helps to identify the advanced learners and slow learners. If any student is not giving the answers to questions, or not performing the skill properly, his/her learning level is poor, he/she can be put in a group that may be slow learners. The class test/ competition performance will be the second level to identify slow learners. Now if the same student earned $\leq 50\%$ marks in any course, he/she will be referred to as a slow learner. If the course teacher finds that some students are ahead on the learning curve, based on their performance in the playground and classroom. After the group discussion/one-to-one interaction found that students had a critical thinking/out-of-the-box approach. Those students can be put in a group which may be advanced learners. The class test will be the second level to identify advanced learners. The student who secures $>80\%$ marks in the course exam, will be referred to as an advanced learner.

1. Methodology to categorize the slow Learner and Advanced learner:

Once the classes of theory and practical commence, the teachers assess the students through subjective (class interactions, group discussion, responding questions and answers, and skill execution) as well as objective assessment (class tests and competition performance). Group and one-to-one interaction between students and teacher during teaching helps to identify the advanced learners and slow learners. If any student is not giving the answers to questions, or not performing the skill properly, his/her learning level is poor, he/she can be put in a group that may be slow learners. The class test/ competition performance will be the second level to identify slow learners. Now if the same student earned $\leq 50\%$ marks in any course, he/she will be referred to as a slow learner. If the course teacher finds that some students are ahead on the learning curve, based on their performance in the playground and classroom. After the group discussion/one-to-one interaction found that students had a critical thinking/out-of-the-box approach. Those students can be put in a group which may be advanced learners. The class test will be the second level to identify advanced learners. The student who secures $>80\%$ marks in the course exam, will be referred to as an advanced learner.

2. Special Programme for Slow Learners:

- They are provided with extra classes for improvement and achievement
- The Department and individual teachers help the slow learners by giving proper guidance and support to them.
- Organize bridge classes and remedial programs for them.
- Conduct extra classes for the difficult subjects in the curriculum.
- The students are given the opportunity to participate in the intramural competition.
- Bilingual explanations and discussions are imparted to the slow learners after class hours for better understanding.
- Getting the support of the advanced learners to the slow learners in making their learning process more participatory and interesting.

3. Special Programme for Advanced Learners:

- The coaching camps are being organised prior to the intercollege as well as inter-university competitions in order to further enhance their skills and learning instincts.
- Individual academic counseling for career planning is done by the concerned subject teacher.
- Doubt clearance session after classroom session.
- Guiding and encouraging to communicate research papers in conferences/Journals.
- Guiding the students for JAM, TIFR, JEST, NET, GATE and other Competitive Examinations.
- Ensuring regular participation of students in workshops, and conferences at renowned institutions of the state and nation.

D) Student Centric Activities: Yes

E) Mentoring for slow learners: yes

F) Activities for advanced learners:

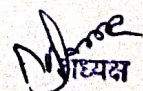

- Provide hands-on practice on how to conduct and organize different sports events and competitions in different spheres of life.
- Provide experience in officiating and organizing the inter-house competition in the form of intramural competitions.
- Motivate to write research papers for conferences/seminars/journals.

List of the identified Slow Learners

Department of Computer Science

2.2.1 The institution assesses the learning levels of the students and organises special Programmes for advanced learners and slow learners

Department of Computer Science ensures that students receive academic, emotional, professional and personal support from the time they join the department. The following methods are adopted to make sure that the needs of both slow and advanced learners are fulfilled:

- The newly admitted students are sensitized to the curriculum offered through Choice Based Credit System & Outcome-Based Education during admission as well as during the induction programme by all the faculty members.
- The Student Mentoring Programme allows assessing the learning levels of both the advanced and slow learners. Weak students having CGPA of less than five are identified and segregated course-wise. The department assigns faculty mentors who guides the student regarding clearing their backlog courses and earning remaining credits. The mentoring sessions are regularly conducted during the semester.
- Remedial classes are offered to students who require more proficiency in their skills. The diagnostic sessions are conducted for students to identify their weak areas and groom them through related activities throughout the semester. For weak students, faculty helps them bridge the gaps in their competence during their free slots.
- Career Counselling sessions are regularly organized by the Training and Placement cell. Professional counseling through trained mentors is provided for the mental wellness of both slow and advanced learners.
- Mock interviews are conducted under the aegis of the Training and Placement cell for final year students.
- Expert Lectures by Visiting Fellow/Adjunct Faculty/Student Programs are regularly arranged to motivate both the slow and advanced learners.

Dr. Ashok Tiwari	Sh. Kartar Chand

About the Institution:

Department of Evening Studies, Himachal Pradesh University, Shimla-171001, was established in July 1962 as Panjab University Evening College, on the recommendation of the University Grants Commission, to provide the facility of continuing education to those who cannot study in day colleges, especially the less privileged persons and those who take employment after schooling. It became a constituent of Himachal Pradesh University when it was established on 22 July 1970. In 1976-77 it moved to its present independent campus—the historical 'Kirk' (Gandhi Bhawan) and 'Manse's buildings.

This was the first institution in the state to introduce M.A. classes in English and Hindi in 1979 and in Public Administration in 1981. B. Com. was introduced in 1975. M.A. in Economics was started in 1990 and M.Com. in 2001. It was renamed Himachal Pradesh University Centre for Evening Studies in July 2001 and as Department of Evening Studies in June 2019.

Outline of the Workshop:

Technology has changed the entire scenario of functioning. The brains which were so far, attempting to create new and innovative ideas through experiences and exhaustive explorations have now turn to technological support. It is undoubtedly a milestone in the direction of excellence in knowledge but excessive comfort has also engendered lethargy and excessive dependence on technology. It has also given rise to large-scale plagiarism. In this perspective, the potential and incumbent scholars as well as researchers need to be oriented in such a manner that they become familiar with new skills and trends in different research activities.

Objectives of the Workshop:

To enable the participants to define the research problem, to develop and approach the research problem and selection of suitable research design. To impart capabilities for formulation and testing of hypothesis based on the nature of research. To comprehend appropriateness of statistical software packages for analyzing research data. To enable the participants to understand writing research proposals and report writing. To make aware the participants about the latest trends in discipline-specific research.

Workshop Outcome:

At the end of the workshop, participants should be able to:

- 1) Design the research in their respective area of research.
- 2) Understand the literature review and identify the research gaps.

Certificate of Appreciation

A National Webinar was organised by the SAP Cell of Department of Evening Studies, H.P. University-Shimla on the topic **“MANAGING LITERATURE REVIEW AND REFERENCES USING MENDELEY”** on 03/09/2022. Dr. Tejinderpal Singh, Associate Professor, University Business School, Panjab University, Chandigarh was the Resource Person of the webinar.

The program was attended by 300 participants comprising of the faculty, research scholars and students from different universities and colleges of the country through virtual mode on Zoom application and YouTube live streaming.

The program was extremely useful, particularly for young academicians and researchers. The key takeaway of the webinar was organisation of literature review and references through Mendeley software and its different uses.

Dr. Tejinderpal Singh's presentation was greatly appreciated by all the participants and the Department extends its gratitude to Dr. Singh for his special talk.
